

## DOSER DIMENSIONING WITH SINGLE AND DOUBLE SCREW

In order to correctly size a volumetric or gravimetric doser, single or double screw, it is necessary to fill in the following questionnaire and send it to BER at [info@ber.it](mailto:info@ber.it)

Company name \_\_\_\_\_

Reference Mr. \_\_\_\_\_

E-mail: \_\_\_\_\_

Direct telephone: \_\_\_\_\_

Product to be treated: \_\_\_\_\_

Specific weight (if known or better to attach the technical sheet to the email) \_\_\_\_\_

Minimum and maximum hourly flow rate \_\_\_\_\_

Precision Request \_\_\_\_\_

Desired autonomy \_\_\_\_\_

Type of loading (hopper hopper) automatic and or manual \_\_\_\_\_

If automatic loading specify the dimensions of the flange or load tube \_\_\_\_\_

Power supply (mains voltage) \_\_\_\_\_

Field of application (Food, Pharmaceutical, etc.) \_\_\_\_\_

Are there any space problems? \_\_\_\_\_

Note
